1. Introduction

The Elections Commission of Maldives (herein referred as ECM) is seeking proposals from qualified and experienced vendors submit proposals to propose a comprehensive on-premises Endpoint Monitoring solution. The solution must provide visibility into user activity to support information security, insider-risk mitigation, compliance, and productivity oversight.

2. Scope of Work

1. The Vendor shall supply and deliver perpetual software licenses for 280 users/endpoints and one (1) management/console instance, with non-expiring activation keys and license certificates issued and registered under (ECM)'s legal name.
2. Licenses must be transferable between devices/users within the organization in line with vendor policy.
3. The Vendor shall also deliver access to the latest generally available software packages for the management/console and endpoint agents (including offline installers and checksums), together with a documentation bundle (administrator and installation guides, release notes, and EULA) sufficient for (ECM) to conduct its own internal deployment.
4. Year-1 Maintenance & Support (M&S)—covering product updates/patches and vendor technical support—shall commence on the license delivery/activation date.

3. Technical & Functional Specifications

3.1. Architecture & Security

- 3.1.1. Web-based management console with RBAC, audit trails, and per-department data segregation.
- 3.1.2. Agent tamper-resistance, optional stealth mode, password/uninstall protection, and integrity checks.
- 3.1.3. Data encryption in transit and at rest; support for TLS certificates issued by our CA.
- 3.1.4. Operates over LAN; supports offline capture with later synchronization for mobile/laptop users.
- 3.1.5. Centralized agent health monitoring and remote updates/rollback.

3.2. Monitoring & Visibility

- 3.2.1. Application usage, active/idle time, and window title logging.
- 3.2.2. Website access logging with time-in-site metrics and policy allow/deny lists.

- 3.2.3. Screen capture (on-demand, rules-based, or interval) with adjustable frequency/quality and storage policies.
- 3.2.4. Session coverage for Local, RDP/Terminal Services, and VDI sessions.
- 3.2.5. File/Folder activity (create/modify/delete), removable media/USB usage, and network share interactions
- 3.2.6. Optional keystroke and clipboard-event logging must be policy-controlled and disabled by default unless explicitly approved.
- 3.2.7. Policy-driven real-time alerts (e.g., keywords, blocked apps/sites, sensitive file actions) with email/syslog/Teams notifications.
- 3.2.8. Powerful search, investigation timeline, and exportable reports (CSV/PDF) with scheduled delivery.

3.3.Performance & Scalability

- 3.3.1. Minimal endpoint overhead; evidence or benchmarks to be provided.
- 3.3.2. Scalable to at least 500 endpoints without re-architecture.

3.4.Compliance & Privacy

- 3.4.1. Features to support compliance with applicable data-protection laws and internal policies.
- 3.4.2. User notification banner capability (configurable) and granular policy scopes per role/unit.
- 3.4.3. Data retention configuration with automated archival and legal hold options.

4. Deliverables

- 4.1. Perpetual license keys/certificates for 280 users/endpoints and one (1) management/console, issued to (ECM).
- 4.2. Software packages (server/console, agents) with checksums and offline installers where applicable.
- 4.3. Entitlement summary detailing license type, version/edition, quantity, covered features/modules, and registration entity.
- 4.4. Year-1 M&S confirmation (support contract or equivalent) stating start/end dates from license delivery/activation.

5. Delivery Schedule

- 5.1. The deadline for submitting the required materials to the Commission and completion of Installation is Maximum 30 days.
 - 5.1.1. This 30-day period will commence from the date of signing the agreement, and it includes public holidays.
 - 5.1.2. The successful bidder must sign the agreement within 3 days from the date of award of the project.
- 5.2. After completion of delivery, the vendor should obtain sign-off on the Installation-cum-Acceptance certificate from the ECM official. ECM will carry out acceptance of hardware as per acceptance test plan.
- 5.3. Delivery will be treated as incomplete in one/all the following situations:
 - 5.3.1. Non-delivery of any hardware, software or other components, accessories, documentation, drivers, media mentioned in the order.
 - 5.3.2. Non-delivery of supporting documentation.

6. Expectations from Bidders

- 6.1. As required by this RFP, the bid must be accurate, comprehensive, and in the format specified. As stated in points 1, 2 and 3, all suggested items must be accompanied by the relevant technical documents.
